

MANTOUX TEST

Your doctor has referred you to Dorevitch Pathology for a Mantoux Test.

This test is only performed at selected Collection Centres. Please phone your nearest Dorevitch Pathology Collection Centre for information regarding this test as an appointment is required.

The test involves an injection in your forearm.

You **MUST** return to the same Dorevitch Pathology collection centre between 48 and 72 hours (3 days). We will then complete the test and send a report to your doctor.

The Dorevitch Pathology collection centre you will be returning to is:

.....

Please return to the above collection centre on the day marked below:

MON TUE WED THU FRI

For a list of our collection centres and opening hours, please visit www.dorevitch.com.au or call your local Dorevitch Pathology laboratory.
